

Introducing a New Product From Indusco...

DIE MASTER LIFT SYSTEM

Patent Pending

BACK INJURIES — THE NATION'S #1 WORKPLACE SAFETY PROBLEM.

Approximately, 33% of all work-related injuries are muscular, skeletal or back-related. According to the Bureau of Labor Statistics, preventing back injuries is a major workplace safety challenge. Further, more than one million workers suffer back injuries each year, and back injuries account for one of every five workplace injuries or illnesses costing industry billions of dollars on top of the pain and suffering borne by employees. **The average individual claim in 2015 amounted to \$60,000.**

Indusco offers a solution to the awkward and dangerous job of changing out dies in the popular 1,000 and 1,500 ton swagers, such as National, Talurit, Sahn or similar.

“The Die Master Lift System” (Patent Pending) is comprised of three components:

1. **The Ergonomic Die Manipulator**, which was designed for stationary placement, offers an impressive 9 feet, 6 inches of reach, giving it the capability to service multiple swagers.
2. **Our Tapered Side Rail** design for ease of die alignment into the swager.
3. **Integrated Die Storage Rack** makes this system ideal for the safe keeping of expensive dies and also aids in their retrieval without the risk of hand injuries.

Keep Your Employees Safe & Increase Your Efficiency & Productivity!

Our system incorporates a number of integrated safety features, which include:

- Ergonomic Design
- No Pinch Points in Die Area – Keeping Hands Free
- Adapted Push Arm for Die Engagement
- Air Magnet Design for Added Security
- Die Holding — Will Not Drop If There Is Loss of Power
- Operates on 70 PSI Shop Air
- High Visibility Green Paint Color
